Coroner Frank Nance dug up a New vs. Cox, 1880, which he quoted as interpreting the report of Wagner.

In other words, when the towel was applied to her neck, she died as the results of the act, but before physical signs could develop to a degree that could be recognized in a post mortem examination."

District Attorney Keyes took a different attitude to the Wagner report. He discarded it as unimportant.

"Dr. Wagner's report means nothing to me," the district attorney said. In reply to Wagner statement, Chief of Detectives Herman Cline is used a statement which said that Hickman confessed to him that he began cutting Marian's body before life was extinct.

Hickman had little to say today, except that he is ready to plead guilty.

Later on he told his guard. "I (Continued on page 6 column 3.)

Mr. Ettelson informed the mayor that the law allows not only a 20-year assessment spread on subways, but applies similarly to sewers, viaducts and other permanent improvements, while a 10-year spread may be made on pavements, sidewalks, and semi-permanent projects. Herestoore, all such assessments have been collected in 5 years.

The mayor said he would instruct Mr. Ettelson and Mr. Faherty to take advantage of the law and extend all assessment periods to the legal limit.

liam Hale Thompson at their scheduled meeting tomorrow.

There are two strings and perhaps a third—attached to the governor's proposal, according to the gossip. First, the governor will insist that an agreement be reached between the companies and the city officials on the bills desired. If that is obtained, it is said, the governor is willing to waive his own personal opinion that the people of Chicago should express their views on the transportation program.

Expect An Agreement.

Expect An Agreement.

The city hall chiefs believe that an accord can be reached between the companies and the aldermen, or an agreement on all major matters involved in the legislative program. So, they assume that the governor's wishes in his first request readily can be met. The second of the governor's strings is said to be a demand that he receive a primary election law that is satis-

Might Ald South Parks.

Might Aid South Parks.

To get Mayor Thompson's approval of that plan, the governor is said to be willing to offer also to have considered at this first session a corrective act for the south park board bond tangle. The governor is prepared to argue that such corrective legislation will hasten the work of providing the five island sites for the proposed second world's fair, and indirectly bring credit to the Thompson administration. Furthermore, it is said, the governor is willing to consider placing in the call for the first special session the proposed amendment to the state constitution by which the city of Chicago can aldbin financing the world's prohibition and narcotic drug laws

constitution by which the city of Chicago can aichin financing the world's fair, as wall done in 1893.

In addition the governor would like a definite promise from the mayor of his support in the gubernatorial fight; but whether Small will insist on a direct and unequivocal promise probably will depend on the preliminary negotiations, according to the gossip brought up from the state capital.

May Yield on School Bends.

Legislation for the establishment of another federal penitentiary will be

May Yield on School Bends.

It is mid Gev. Small would, if presed—although he desires to avoid it—consider legislation permitting the mayor's plan to become effective by which schoolhouses would be built by bond issues. Also the governor is mid to be prepared to have the call for the first session include transportation as well as primary legislation, but in that case he desires an agreement in advance on the leight of the special session. He does not want the legislators would be more interested in transportation because to the legislators would make next year. It is reported to be the governor's impression that the legislators would be more interested in transportation.

Rag-Paper Edition of The Chicago Tribune!

100 keep an imperishable record of our time The Chicago Tribune will start publication, on Jan. 1, of a rag-paper edition. After the final editions of the paper are off the press, this new permanent paper will be run through and The Chicago Tribune will be saved for posterity.

No library will be complete without this special imperishable edition. Universities, historians, economists who are thinking ahead to future generations will want this rag-paper edition of The Tribune.

What Will the World of 2500 A. D. Think of Us?

Where can the future historian find so accurate a record of the times? The dress, the customs, the food, the architecture, the industries, are all a part of the daily record of a newspaper. What will the centuries to come think of the prohibition act, the League of Nations, Mexico, the 1928 presidential campaign, the price of eggs,

short skirts, bobbed hair, daily fiction serials, comic sections, rodeos, the traffic problem, permanent waves—the thousands of details of life that the daily newspaper records? There can be no other source of information on contemporary life-whether of statesmanship or petty crimes to equal the imperishable rag-paper edition of The Chicago Tribune.

Send in your order for the ragpaper edition now. Don't miss a single issue starting Jan. L.

The new confession was written by Hickman personally. In its relation to his story of the kidnaping and killing of the child it is virtually identical with that obtained by District Attorney Assa Keyes.

The confession makes no mention of delicatessen stores in Chicago.

The armonal has a clean, park-like appearance. Its great buildings are of Joliet stone or concrete and steel. There are some signs of activity, a few automobiles before factory doors, a few workmen, lights, but over the whole immense establishment, a sense of deese; tion, grim, waiting, rather than present life, seems to hower.

MAYOR'S FRIENDS TODAY GET REINS OF LINCOLN PARK

Pike and 3 Others Accept Places.

BY PARKE BROWN.

Mayor Thompson's friends, headed
by Eugene R. Pike, are scheduled to
alke over control of the Lincoln park
ystem today.

Although he wavered about accepting the appointment held out to him by Gov. Small ten days ago, Mr. Pike has concluded to take the place, and the other Thompsonites, Charles H. Morse, John R. Thompson Jr. and H. Wallace Caldwell, have said they would accept if Pike did.

At their request the annual meeting of the board, headed by David H. Jackson as president, was merely called to order yesterday and a recess was taken until 3 o'clock this afternoon. At that time the new Thompson majority will be sworn in In addition the three commissioner reappointed, Alexander Fyfe, John A. Torstenson and Albert Z. Halperin, are expected to sit down with them.

Whether all the latter three will be on hand is doubtful and it is not believed that the situation of having four Thompson men and three of Small's or Lundin's people can continue for long. It is recognized in advance that the mayor's quartet will immediately take the reins and that Messrs. Fyfe, Torstenson and Halperin will be in the position of back

Fred Lundin, it is said, wants then to stay on the job in order to keep track of what's going on, but at least one of the trio is said to be dissatis fied with the prospect of retaining ful responsibility for the board's actions with nearly the said to be action.

Report Mayor Wants More.

There are still rumors that the mayor wants another place or two on the board and he might get then if the Lundin trio are treated like dummy directors and become peevisle about it. In the event that another place comes Thompson's way it may go to his sister, Helen Thompson Pelouze, wife of Col. William Nelson Pelouze, who resigned from the board

When Pike did two years age.

Gov. Small is said to believe that in giving the mayor Lincoln park he has satisfied all of Thompson's de mands, but those in Thompson's confidence say the mayor regards the north side plum as only the first step and that, having gained this, he will start pressing the next demand or his list. That may be a repetition of his original insistence that Dr. John Dill Robertson be kicked out of the

Gimbel's Restaurant uses The Tribune and has the biggest Thanksgiving in its history!

THE OWNERS of Gimbel's Restaurant at 30 West Randolph Street knew that everyone in Chicago wanted a turkey dinner on Thanksgiving Day. They also believed that hundreds of people would like to avoid the trouble and inconvenience of preparing their own.

Gimbel's determined to be hosts to as many of these Chicagoans as

How did they reach them? Thanksgiving morning a quarter page advertisement was placed in The Tribune. Here's what Fred Gimbel has to say about the results:

"We are pleased to inform you that the result of our Thanksgiving Day advertisement in The Tribune was the most successful of any in our twenty years' experience.

"With only 570 lines of advertising in your paper exclusively, we better than trebled our business over that of Thanksgiving, 1926. Last Year we omitted our Tribune advertising.

"It is needless to tell you that we are firmly convinced that intelligent Tribune advertising plus honest value-whether that value be in food, merchandise or service-is a combination difficult to beat in this community."

At any season of the year Chicago restaurant proprietors can increase their business through Tribune advertising. The Daily Tribune reaches over 250,000 more readers in Chicago and suburbs than any other Chicago daily-over a quarter of a million more prospective customers than any other Chicago paper can furnish you!

Advertise regularly in The Tribune! The results you get will show you why The Tribune carries more "Hotel and Restaurant" advertising than all of Chicago's evening papers combined-and twice as much as the other morning paper!

Floods Swamp Country as Snow Melts.

London Digs Out.

London gradually is returning to normal. The old city had the snow all removed from the streets when the citizens returned to business today, but the adjoining city of Westminster and outlying boroughs are masses of melting slush, with only the middle of the main streets cleared.

England still is isolated from the continent. All telegraph and telephone wires are down and the only means of communication is radio, which is working excellently.

Dover, Folkestone, Calais and Boulogne are crowded with thousands of passengers waiting for a chance to get across the channel. One boat was run yesterday and one today, but the weather prophets promise an improvement tomorrow.

Don't Discard Your Old Furniture. Sell It!

JOHN WEAVE,

WHEN furniture has outlived its desir-ability, but not its usefulness, don't relegate it to the attic, or sacrifice it to a second-hand man at a fraction of its value! Some family in Chicago is in need of the very article you wish to sell and would gladly pay you a fair price for it.
The most economical and certain way of
getting in touch with this family is
through a Tribune Want Ad. So Mr. John Weave of 5517 Broadway

found when he cast about for a way to sell most profitably his disearded household goods. After experimenting with different methods he wisely placed an addescribing these goods in The Tribune Want Ad Section. By noon the next day he had sold every article at a good price!

Day in and day out The Tribune Want Ad Section performs this service . . . bring-ing together buyers and sellers in every type of deal. No matter how limited or how wide is the appeal of the article you wish to sell, somewhere in the vast Chi-cago market you will find people inter-ested in buying it , , , if you call—

DEFENSE FIGHTS EACH STEP IN WAY OF HILL'S TRIAL

Loses First 3 Motions; Fourth Ruling Today.

Ottawa, Ill., Dec. 28.-[Special.]-Defense attorneys made it plain today that they are going to contest every step in the trial of Harry Hill, son of Streator oculist, charged with the killing of his mother.

Already three motions have been fired at the prosecution. One was a demand that the state elect on which one of the five indictments Hill must stand trial. Another was an objection to A. J. O'Connor as a special prosecutor in the case. The third was a challenge of the array of petit jurors challenge of the array of petit jurors who had been summoned to try the Col. R. R. McCormick

New Year's Rolls

Parker House rolls are a distinctly American hot bread of the yeast type. They have a long and interesting his tory, if we start with their origin and go on with the story of their popularity and wide acceptance. In the following recipe less flour is used, or is necessary than in almost any other formula we can find, but a very dainty, light, and tasty roll cam be made with the smaller amount of flour. Too many of our old time recipes give heavier and stiffer products than we like, because too much flour is used.

Here is the formula: Two cups of milk, four cups of bead flour, one-half a yeast cake, two tablespoons of the story of the popularity and without the size of half an egg, leave on a well is made last, and east of half an egg, leave on a well the size of half an egg of antifer.

This is fine recipe that came from a good family. It does not follow exactly the hotel cook's method of making Parker House rolls.

Here is the formula: Two cups of milk, four cups of bread flour, one-hal

Continuing our figure of speech, we might say it is best red, for red fox as a trimming for the wrap of the winter is supreme in sartorial interest. This type of fur appears frequently on the black coat, and it is the favorite way to set off the more un-usual but immensely chic coat of navy blue. Then there are numbers of soft woolens in the beige, brown, and tan ranges which find their ideal comple-ment in red fox. Usually the fur is applied in the familiar form of the whole animal scart.

whole animal scarf.

Even the evening wrap sometimes chooses this kind of pelt to adorn its rich velvet background. For example, Mrs. Vingent Astor appeared at a recent fashionable first night wearing a bottle green velvet cape trimmed with red fox. The cape was made with a capelet extending to the waist line, and this capelet was bordered in the authors for the contract of this contract of and this capacit was bottered in auburn fur. Of course, this contrast of green with the reddish pelt is beautiful and is but one more instance of the favor accorded both the green and the orange red tones for evening wear.

served by any means for the opera or the ball. Daytime attire reflects them as well, and to this fact our sketch of a kasha model bears abundant testimony. For here is a brown kasha with decided orange lights, and its color is enhanced by a trimming of dull gold braid. The braid figures not only in a point on the corsage but as a border point on the corsage but as a border and ornamentation for the circular skirt. Notice the standing collar with its cravat of self-material.

Some times in children the mind is development are decreased, sometimes the visible strength and development are decreased, sometimes the interest in physical activities and fun, so that children have not enough contact with their young friends.

We must remember that growth is a tremendous accomplishment of the body, and that this growth must be balanced, a complete functioning.

It is not just that Jimmy's feet almost touch the footboard of the bed now and you realise it with a shock, or that Janey's curly head is nearly up your shoulder, or that somebody took Bill for 18 the other day. There's more to it than just an increase in physical activities and fun, so that disposition suffer, or the would be stunning.

Then she was let in or the secret of the new face. It was a second operation of the kind. And the observer was right. So tightly was the skin drawn up and in that her eyes were just about all that could be moved.

Women will go on being susceptible to the claims made by quack surgeons that they are going to come out of these operations perfecetly rejurented as to face. No argument is going to stop them. No argument is going to persuade them to investigate the character of the operators. And so faces will be submitted to treatment that is little short of criminal.

Why should a woman of 50 expect to have the smooth skin of 20? It is reasonable enough and only right that one keep the age signs off with the massage movements that bring the blood to the surface and stimulate it. Creams are used to preserve the skin texture and astringents to keep it supple and smooth. But it is foolish to change a face that has only the wrinkles that come normally with age for one of looking glass tightness.

Not having much taste for the girl

One can do a neat face lifting job of her own through the medium of expression. There are twenty-four pairs of opposing face muscles that constantly register your mood. When you are disgusted, harried, worried, grouchy, sullen, or morose, the face muscles are drawn downward. When you are serene, optimistic, happy, the face is drawn upward. The formula for the "lift" that has real beauty in it and without a single element of danger is to keep the face muscles on the upward trend.

AGAIN Atwater Kent makes a radical advance in adio. Here at last is an A. C. Set reduced to its essentials.

Compare this amazing Model 37 A. C. Receiver with every other set using power from an electric light socket. Remember that this handsome but inconspicuous little receiver contains everything except the speaker. You attach antenna, ground wire and speaker and then put the plug into any convenient electric light or wall socket. That is all there is to it.

All the power that you used to get from A, B, and C batteries comes from your house current now through a compact power supply built right into the receiver.

No array of wet and dry batteries, eliminators, chargers. A few

moments after delivery, you can listen to music. When we say that this new Atwater Kent 37 is unlike any other

A. C. set you have ever seen, we mean just that.

How is it different, you ask?

For one thing, it's simpler-simpler inside, simpler outside. This counts in fine performance and easy operation, as well as in freedom from those little attentions that no one should have to bother with

It's also smaller. Our engineers knew that the essentials which every electric set has to have could be built right into the set without making it big and clumsy if only the right way could be found. They found the way. Skillful arrangement has removed all waste space.

And so you have a true electric set, powered entirely from the house circuit, needing only your touch on the switch to send the current through the A. C. tubes and start the music-a true highpower A. C. set, but compact.

Here are a few of the other advantages of this unique new Atwater Kent 37:

- 1. Exquisite tone, without disturbing power-noises.
- 2. Shielded cabinet and doubly shielded built-in power supply -assuring this superiority of tone.
- 3. True single dial control, including innovations which cannot be copied without infringing on Atwater Kent patents.
- 4. Every working part of every receiver matched for that particular receiver.
- 5. Every part tested for accuracy—some even to a fraction of a thousandth of an inch.
- 6. Every part protected against deterioration. This means long life for your set—a lifetime of pleasure for you.
- 7. Full-vision dial. You don't have to scan the numbers closely. Read the whole dial at a glance, just as you look at your watch. A turn of your wrist takes you to every station within range in a split second.
- 8. Efficient volume control. You can bring the music down to
- 9. A cabinet only 7% inches high, 17% inches long—with everything inside except the speaker. Small, convenient—you'll never have to ask "Where can I put it?"_it fits in anywhere.
- 10. Your choice of two color combinations-deep rich brown and old gold or golden brown and old gold—both in the new satin finish.

11. Price-\$88.

We purposely put the price last because every prudent buyer

wants to know first what the set will do and how it will stand up as time goes on. Then comes price. Amazingly low? Yes-am if you didn't know that Atwater Kent has the facilities for large production which alone makes such prices possible.

If we made the Atwater Kent Model 37 a few at a time, it too would be expensive.

Its price is low because the universal popularity of Atwater Kent Radio has brought the enormous savings of automatic, quantity production. These automatic processes, while achieving great economies, also attain a degree of engineering precision which is the marvel of the radio industry

From the beginning, it has been the Atwater Kent policy to perfect a set before asking the public to approve it. And when we say perfected," we mean a receiver which will give complete and lasting satisfaction; from which all trouble, crudities and non-essentials have been refined; which gives pure, natural tone; which is mechanically and scientifically right; and which can be produced economically.

We present Model 37 as the highest development of radio today -as giving all that you desire of radio-and at the lowest price for which perfected radio is offered.

Try this set at an Atwater Kent dealer's or better still, at home. Raise the lid and see how it's made. Listen and be convinced.

Hall, chairman of the national football rules committee, the eastern association of intercollegiate football officials tonight went on record as favoring only such changes as will clarify the existing code.

Earlier in the day, Mr. Hall, in an address before the association, had announced that complete recodification of the rules was planned in an effort to simplify them. Although Mr. Hall's report as chairman of the rules committee will not be made until tomorrow, he indicated in his address his personal opposition to any major changes in the code.

Although the eastern association's recommendations were largely of a technical nature, suggesting alterations in the language of the rules to make them clearer, a few new regulations were proposed. Company, a Delaware
Corporation, will furnish,
through operating properties, public utility service in various communities of Illinois, Wisconsin, Michigan,
Indiana, Pennsylvania, Maryland, Maine, New
Brunswick and Florida, comprising a population
of approximately 435,000. The sources of net
revenue of the properties are reported as follows:
electric light and power 80.8%; gas 12.0%; water
2.7%; railway, ice and heat, 4.5%. A majority
of the properties in Wisconsin, Lower Peninsula
of Michigan, Maine and New Brunswick are
hydro-electric. The present capacity of the electric stations equals 90,745 h.p. of which 23,515
h.p. is hydro-electric. Connected to these stations are 1,038 miles of transmission lines. The
gas plants have a rated capacity of 5,070,000 cubic
feet of gas per day and the gas distribution systems total 371 miles of mains. Manufacturing
and distribution equipment is of good design,
enabling the Company to maintain efficient
operations.

Restrictions: No other class of stock (other than additional shares and series of this Preferred Stock) senior to or on a parity with this issue, may be created or authorized. No shares of this Preferred Stock (of all series in the aggregate) may be issued unless the consolidated net earnings (as defined in the amended certificate of incorporation) for twelve consecutive months out of the preceding fifteen shall equal 2½ times the annual preferred dividends on all Preferred Stock (of all series) issued and to be issued. Assets: The properties of the Company, as appraised by independent engineers, show a net depreciated value substantially in excess of the total funded debt and both series of Preferred Stock (taken at \$100 per share) presently to be outstanding.

Earnings: Consolidated earnings of the properties to be owned upon completion of present financing, for the twelve months ended September 30, 1927 (excepting that for certain properties, earnings are for the twelve months ended October 31, 1927), irrespective of dates of acquisition, adjusted to give effect to present financing, as officially stated by the Company were as follows:

Operating Expenses, including maintenance and taxes, other than income Taxes but excluding depreciation 2,963,038.48

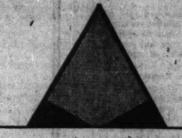

The net earnings as shown above, after deducting annual interest charges on funded debt, are more than 2.9 times the annual dividend requirements on all this preferred stock (of both series) to be outstanding.

Purpose of Issue: The proceeds from the sale of this stock will be used in part for the acquisition of new properties (including Rockford Electric Company), to retire indebtedness and for other corporate purposes, or to reimburse the Company for such expenditures.

CENTRAL TRUST COMPANY OF ILLINOIS, CHICAGO, TRUSTEE

Mr. Walter R. Barber, President, has summarized his descriptive letter, as follows.

HISTORY AND BUSINESS: The United Autographic Register Co., was incorporated under the laws of the State of Illinois in 1894. The Company has shown a profit in each of the thirty-five years of its operation, and has built its present properties entirely through reinvestment of surplus earnings. Its business, under the trade name "Uarco Business Systems" is the formulating of cost and labor saving business systems, the installation of the necessary equipment, and the printing of the continuous forms for use therewith, such as invoices, charge records, factory orders, and other similar business forms.

The Company has grown steadily, until now it is one of the leaders in its field, having on its books over 50,000 active accounts, which are constantly using and re-ordering its forms. Its business is nationwide and includes many of the leading institutions of the country.

PURPOSE: The proceeds of this issue will be used to provide approximately 60% of the purchase price of the assets and business of The Mani-Fold Company, of Cleveland, Ohio.

PROPERTIES: The Company owns in fee manufacturing properties in Chicago, (Corner of 43rd Street and Western Avenue); and Oakland, California, and is acquiring the property of The Mani-Fold Company, Cleveland, Ohio. These plants are all situated in established manufacturing districts, and are of standard brick and steel construction. The machinery and equipment are of the most modern type and construction, a considerable portion having been designed and built in the Company's own experimental laboratory. Coats & Burchard have appraised the properties at Chicago and Cleveland, and to their sound value there has been added the depreciated cost of the Oakland plant and additions to the Chicago property since the appraisal, resulting in a present sound value in excess of \$1.560.000.

SECURITY: The Bonds will be the direct obligation of the Company and will be secured by a first mortgage on land, buildings and machinery, of a sound depreciated value of \$1,560,000, as described above. In addition, the balance sheet of the Company as of September 30, 1927, certified by Arthur Andersen & Co., giving effect to the acquisition of The Mani-Fold Company and the financing incident thereto, shows net current assets of \$586,697. Net tangible assets, after deducting all liabilities other than these bonds, are \$2,144,843, equivalent to \$2,859 for each \$1,000 Bond.

EARNINGS: Net earnings including those of the property acquired through this financing, as certified by Arthur Andersen & Co., after depreciation based on cost and all other charges, available for interest on these bonds and Federal taxes, for the past two years and nine months have been as

1925 \$273,468 \$298,175

9 Months Ending Sept. 30, 1927 \$196,719

Such earnings have averaged \$279,404 annually, or 6.2 times the maximum annual interest on sible through unified operation and management. For the five years, 1922 to 1926, inclusive, net earnings of the United Autographic Register Company alone were approximately four times the maximum interest requirement on these bonds.

SINKING FUND: The trust indenture provides for the deposit on or before each January 1 and July 1, with the first payment on July 1, 1928, of an amortization fund of \$47,500, to be used by the trustee, first for the payment of the semi-annual interest, and then for the purchase of bonds at or below the current redemption price, or, if not obtainable, then to the redemption by lot on the next interest date. The principal retirement, through the sinking fund, if the bonds are obtainable at par, will be \$50,700 for year ending January 1, 1929, steadily increasing to \$83,000 for 1937, and resulting in the retirement of approximately 80% of the present issue by maturity.

PRICE 100 AND ACCRUED INTEREST

Legal proceedings under the supervision of Pam and Hurd, Chicago. Appraisals by Coats & Burchard. Audits by Anthur Andersen & Co. for the United Autographic Register Co. for the years 1922-1927 inclusive, and for The Mani-Fold Company for the years 1925, 1926, and 1927.

Offered when, as and if issued and accepted by us, and subject to approval of counsel. Delivery in the form of temperary bonds anticipated on or about January 10, 1928.

Gas Consumption Doubled in Lcst Ten Years

In one of Thomas Edison's old notebooks are found these words:

"Gas will be manufactured less for lighting, as a result of electrical competition, and more for heating, thus enlarging its market and increasing its income."

The fulfillment of this prophecy is borne out by the fact that now 6% of the gas output in the United States is used for lighting and 94% for heating. Gas consumption throughout the country has doubled in the last ten years.

Associated System Serves 1 Out of 92 Gas Customers

From a small beginning in 1852 when the Ithaca (N. Y.) Gas Light Company served 28 customers, the Associated Gas and Electric System has grown until now it serves 600,000 customers of whom 184,000 are served with gas.

There are 17,000,000 gas customers in the United States. One out of every 92 of these is served by the Associated System.

(to be outstanding upon completion of present financing) Ten-Year 5% Sinking Fund Gold Debentures (this issue) \$3,000,000 Capital Stock—100,000 Shares or Certificates of Interest, without par value, representing net assets carried on Company's books (August 31, 1927) at

The following is taken from information submitted to us by the Company:

M. J. Whittall Associates, Ltd., business founded in 1879, is one of the M. J. Whittall Associates, Ltd., business founded in 1879, is one of the leading manufacturers of rugs and carpets in the world and one of the largest producers of high grade jacquard carpet fabrics. Its products consist of Wilton, Brussels, plain and Chenille rugs and carpets, including the famous Whittall Anglo Persian Rugs. Products have a broad, national distribution to about 1,650 customers, including most of the large retail stores in the country, many of which have been continuously selling Whittall rugs and carpets for many years. Sales offices are maintained in New York, Chicago, San Francisco, St. Paul and Dallas.

For the five years ended August 31, 1927 net earnings, after depreciation, averaged over 7 times the interest requirement on these Debentures. In each of these five years earnings have been substantially in excess of such requirement and in none of the twenty years since 1906, when the Association was established, have such earnings been less than this

Based on the balance sheet as of August 31, 1927, adjusted to show results of present financing, total net assets are over \$3,000 per \$1,000 Debenture. Net current assets alone are over \$2,000 per \$1,000 Debenture. Total current assets are more than 8 times current liabilities. There is no

Billion Dollars for New Year Investments

On the first business day of the New Year more than four billion dollars will be paid to investors in corporation securities alone, according to a leading financial authority. How great the sum total available for January investments will be no man can estimate.

Naturally not all of this tremendous sum will be invested wisely. Investment knowledge is spreading, however, and a steadily increasing number of security purchasers select rather than buy—select, first, the house, as to its integrity, responsibility and experience; and, second, the investment, for its inherent soundness and its income return.

To this prudent class of investors S. W. STRAUS & CO. offers its services based on 45 years of successful experience. Our January offerings include a widely diversified list of carefully selected bonds of various standard types, including, of course, first mortgage real estate bonds in which we so long have specialized, yielding as high as 51/2-6%.

Owing to the great amount of investment money available we suggest prompt action before many attractive issues are sold out. Please call or write for

The Lengthening
Life Line
of GAS

W/HEN electricity began to usurp the W position formerly held by other illuminants, there were some people who thought the death knell of the gas business had been sounded. Just as there were some who once regarded the automobile as a toy, considered motion pictures as short-lived playthings and thought the radio would forever still the voice of the phonograph.

But not so did gas engineers regard the matter. With the increasing sale of electricity, gas research work was stimulated. Manufacturing processes were improved. Costs of production were lowered. New uses for gas and its byproducts were found. The line on the chart, from 1920 on, tells the story of the results achieved.
